

## WHO WE ARE

Advocates for Alexandria Aquatics (AAA) is a group of citizens representing a range of interests and aquatic backgrounds.

Our mission is to bring together the city government, the Alexandria community and those passionate about aquatics to create a vibrant aquatics system that meets Alexandria's needs for many generations.

This public-private partnership model was successful in developing the Miracle Field and playground at the Lee Center.

## OUR GOALS

City Council has approved \$23 million to build new pools. AAA has been asked to raise \$5 million in private sector funds to supplement those dollars. Working together, the City and its residents can deliver on:

**Two pools at Chinquapin**  
A new indoor 50-meter pool and the addition of family-friendly features to the current pool

**Two new pools at Old Town**  
Replacement of the current pool with a lap pool and a family pool & bathhouse renovations

**A new pool at Warwick**  
A recreation and lap pool with a kid-friendly pool

**Lee Center therapy pool**  
A warm-water pool for therapy and water fitness

## ALEXANDRIA DESERVES BETTER

Indoor and outdoor aquatics rank as one of the top five unmet needs.  
*City of Alexandria Parks Needs Assessment*

“All existing outdoor pools (except Charles Houston) are very old pools that have been renovated multiple times. ***It is time to replace the pools*** rather than put more money into the existing pools, which are functionally and physically obsolete.”

*Councilman-Hunsaker and  
Kimley-Horn & Associates, Inc.  
2012 Aquatic Facilities Study*

Learning to swim is an essential life-safety skill – especially in a community adjacent to the Potomac River. Hundreds of children are on waitlists for swim lessons because our current facilities don't provide enough space.
